Public Works Greenwald reported that the water leak at 153 Shoreview Drive has been repaired. The street will be patched next Spring.

There was a watermain break at 100 Frank Avenue NE on November 21, 2025. The main is six-inch cast iron. The repair consisted of two couplings with a small piece of plastic in between. The inside of the main looked clear with no debris.

Greenwald reported that Lift Station B was not operating and needed to be repaired. Two floats were bad and had to be ordered from Minnesota Pump Works. The City does not have those pumps on hand. The repair has been made and it is now working properly again.

Verizon has finished the update to the water tower and SEH Engineering will be conducting a final inspection. There is some work that Verizon has not completed that they stated they would do such as remove antennas that are no longer in use.

The new City Hall generator did not start during regular Monday testing. A representative from Generator System Services has determined that a warranty part has failed. It is on order and will be replaced.

On motion by Houlihan, seconded by Hunter, all voting in favor, to close the Regular Meeting and open the Public Hearing at 6:10 pm.
